Rare sightings include Durant and Kakuna. Common Bug types can be found in Gale Forest and Route 10, while Very Rare Scyther and Legendary Pokémon like those found in the Seafam Islands are extremely hard to catch. Legendary and Mythical Pokémon are rare and incredibly powerful, often appearing prominently in myths and legends surrounding the Pokémon world. Many Legendary Pokémon serve as version mascots for core series games. These Pokémon possess unique powers and are often worshipped by specific groups due to their exceptional abilities. Common characteristics among these Pokémon include impressive stats and performance in battles. Most Legendary Pokémon can only be caught once, but some exceptions exist. In certain games, such as Pokémon Brick Bronze, these Pokémon may become available again through Set Encounters or roam freely from version 0.10 onwards. Legendary and Mythical Pokémon can be encountered randomly while roaming, but they are rare, so players should save often and turn off Autosave to have an advantage. The Lake Guardians Uxie, Mesprit, and Azelf can only be found in Fossilized Eggs, while Manaphy Eggs that wash up on shore during the event at Rosecove Beach contain multiple Manaphy. Legendary Pokémon in Pokémon are very rare and hard to find, but they can be seen in certain places. For example, Groudon is a Ground-type that can only be found in Mt. Igneus, while Kyogre is a Water-type that can only be seen in Rosecove Beach. Some Legendary Pokémon like Dialga and Palkia are flying high in the sky, while others like Zapdos and Moltres soar through the air as well. Then there are the Legendary Birds such as Articuno, Zapdos, and Moltres. These birds have special powers and can only be seen in certain places like Silver Cove and Frigidia Cavern. On the other hand, Hoopa is a very rare Pokémon that can only be found in Demon's Tomb. It has the power to summon its friends and allies. Lastly, there are some new Legendary Pokémon such as Victini and Diancie that have been recently discovered. When Hoopa's form is destroyed, it becomes incapable of switching between its forms. In Demon's Tomb, if you catch Hoopa Unbound, it won't transform into Hoopa Confined even after three days have passed or reloaded from your PC. On the other hand, catching Hoopa Unbound successfully unlocks Hoopa Confined as a roaming encounter that cannot be transformed back into Hoopa Unbound if caught again. Additionally, Phione's mythical status is currently disputed among Pokémon enthusiasts and officials alike, with various pieces of evidence often contradicting each other regarding its viability.
